Reid,
Thanks. Have a good weekend!
Tom

Ok, all of the changes have been made except two. I can't figure out how to get the paragraph spacing uniform. I'll keep working on it but I'm attaching the final with this note. Second, I see no reason why the print version fades around the word Pinon.

I believe all the footnotes have periods, and I have included the docket numbers within the sentence. Part is now part, I've added some language on p 59 to clear that question up. Section underlining is now uniform, I think all extraneous markups are gone.

Executive Orders Review is now uniform. I had to include voluntary standards, etc. due to ADP policy.

I'll keep working on the two outstanding issues. Have a good weekend.

P 30 in list, 3. A leachate.... Needs to be moved to the left.

P 32, paragraph spacing at the top of the page; lighter font we discussed

P 33 delete space after the footnote 15 at top of page; paragraph spacing issue before "The White Mesa..." sentence

P36 lighter font with Canon City

P 39 and 41 personal communication with EPA staff we talked about already

P 40 add commas at top of page: "... meet the requirements of 40 CFR 192.32(a), which, in addition to requiring ground-water monitoring, also..."

P 43 and 44 and do a global search. 40 CFR Part 192 or Part 192 should use lower case "p"

Globally for footnotes make sure they all have periods at the end e.g., p 26 but there are many that don't. Some web links have periods and others don't so just have every footnote end with a period for consistency.

P 59 a little confusion at the top of the page.. not clear what "it" is

(b) (5) - Deliberative process privilege

(
b
)

P 69 parenthetical citations need to be consistent with the placement in the sentence or out. Its done both ways "...reviews of existing facilities (EPA-HQ-OAR-0218-0066)." See bottom of p 57 for a counter example "...the water/air interface before decaying. (EPA-HQ-OAR-0218-0087) It therefore...." I suggest a global search on (EPA-HQ to find the citations. But there are other flavors, too. On page 69" ... determining GACT (See Section VI.)."

P 74 above paragraph "in making these..." have a spacing issue

P 78 10 CFR Part40 needs to be 10 CFR part 40—have a "P" issue and a spacing issue

P 81 with the equation, my copy has a vertical line in the left margin; also footnote is a sentence w/o a period at the end but you probably already caught that.

P 87 and possibly into p 88 it appears text is justified on the right margin

P 89 top of page paragraph spacing issue before "The unit..." sentence

P 92 vertical line at left margin at the word Table 3

P 93 top and bottom of page each have a paragraph spacing issue and capital P in Part 192

P 94 top of page "ponds" to "ponds" –need an apostrophe after the "s"; paragraph spacing issue before and after V.

P 97 and 99 spacing issue after C. Weather Events and before D. Applicability of....

P 102, 103 still have editing marks and Table 4 strikethrough that needs cleaning up; Also is Table 4 correct and Table the typo here?; also paragraph spacing issue above 103 "The baseline costs..."

P 112 at top of page before "Accordingly, EPA..." need to delete the carriage return or indent. Probably delete the existing return.

P 115 comments on ICR go to OMB and EPA... middle of page: "...to submit comments to EPA. Send comments on the ICR to OMB at the ..." added 'on the ICR'

P 116 near the bottom is the "I certify that" section. Is this the right place? Shouldn't it be at the end of that section, just before D? I don't know the format, but it seems out of place to me, but do whatever the format requirements are.

P 117 at bottom put in a space "20pCi/" to "20 pCi/"

P 118 weird text with Pinon

P 119 lowercase p in Part and delete "(ISL)"; change ISLs to ISL facilities in at least 3 instances. Check document for others.

(b) (5) - Deliberative process privilege

P 122 and 123 Should section headings be underlined to be consistent with others? See D. Unfunded Mandates Reform Act and E. Executive Order 13132: Federalism. Please check to make sure headings are or are not underlined according to convention

(b) (5) - Deliberative process privilege

On to the regulation!

Tom
